## SensaSwitch<sup>®</sup> + SensaDimmer

SensaSwitches include passive infrared (PIR) sensor technology, automatically turning lights on or off when you enter or leave a room. The design features an innovative micro-movement sensor that allows you to also manually turn on lights with a soft touch of the finger. SensaSwitches are available in three models:

- Auto-ON/Auto-OFF: Automatically turns lights on when you enter a room and off when you leave. (Occupancy Sensor)
- Manual-ON/Auto-OFF: Allows you to turn lights on when you enter a room and automatically turns them off when you leave. (Vacancy Sensor)
- Manual-ON/Timer-OFF: Allows you to turn lights on when you enter a room and select a time for lights to turn off (options include 10, 20, 30, and 60 minutes). (Timer)

The SensaDimmer turns lights on when you enter a room and off when you leave, but can be adjusted to become Manual-ON/Auto-OFF if desired.

Now with lasting Microban<sup>®</sup> antimicrobial\* protection for cleaner, more durable devices.

### Coverage Area

The Occupancy Sensor, Vacancy Sensor, and SensaDimmer each have a maximum coverage range of 180 degrees and a coverage area of 600 sq. ft. The sensor must have a clear and unobstructed view of the coverage area. Objects blocking the sensor's lens may prevent detection thereby causing the light to turn off even though someone is in the area. Windows, glass doors, and other transparent barriers will obstruct the sensor's view and prevent detection.

## Illumination Accessories

You've never seen a night light that hides itself so cleverly, yet responds so elegantly to a simple touch. Or one that can be lifted from its home on your wall to double as a carry-around flashlight. When it comes to brilliant solutions, adorne really shines. All night lights include ambient light level sensors. Each features a range of settings, including: Always Off, Low, Medium and High. If set to Low, Medium or High, the night light's LED will only be visible when the ambient room is dark. To change the selected setting, simply push on the square in the upper right-hand corner of the night light.

## Modular Unit Dimensions

### Half-Size Dimensions

### Full-Size Dimensions

### Plus-Size Dimensions

- The basic building block of the system is a half-size unit (45mm x 22.5mm).
- All devices have either half-size or full-size front faces.
- Devices can also have half-size, full-size or plus-size back bodies.
- Most switches, dimmers and outlets are in the full-size format (45mm x 45 mm). This is the standard adorne proprietary "45" opening.
- Select outlets are available with a plus-size front face (67.5mm x 45mm) for easier access to power and/or USB ports.
- Plus-size devices must be paired with 1-Gang+ wall plates.

## The adorne Frame System

The frame is the foundation upon which the adorne modular system is built. It is manufactured with high-strength galvanized metal and includes a ground wire.

Frames include plastic spacers. The spacers remain in place for devices with full size back bodies. They must be removed for devices with plus size back bodies, such as dimmers and GFCI outlets.

The frame completes the enclosure, providing a safe installation during the construction phase and allowing the wall plate to be installed at the end of the project.

Each frame includes a leaded ground that supports the full adorne system. Most switches, outlets and wall plates (including cast metals) are automatically grounded to the frame, saving time and ensuring a safe and reliable ground path.

Devices simply snap into the frame from the front. During installation, screw the frame to the box, then pull the wires through the frame and wire the device. Then, simply snap the device into the frame.

## Wall Plates

Available in six gang sizes, adorne wall plates provide the perfect complement to adorne switches, dimmers, outlets and accessories. The collection includes a variety of finishes, from cast metals like Satin Nickel and Oil-Rubbed Bronze to real materials such as linen and wood. In addition, the collection includes a full offering of plastic plates in contemporary and classic colors, as well as three innovative Soft Touch finishes. Each wall plate is packaged with a mounting frame to enable easy installation when paired with a device. All plates are screwless and simply snap onto the included metal frame. See page 40 for more information on the adorne frame system.

All adorne wall plates are UL and ETL-approved. 5- and 6-Gang wall plates are not available in all colors.
